

Hydraulic Industrial Toe Jack

CE

Move It-Holland offers a range of high quality industrial toe jacks from 5ton to 25ton. These toe jacks can be used to raise loads and place skates underneath them as well as for general repair or maintenance and for installation of heavy items(eg factory machinery, containers etc).

All of our jacks have dual lifting capacities: you can lift by using the toe or the head of the jack.

Features

- » Industrial quality, heavy-duty type.
- » With compact and stable structure.
- » No chaining trouble.
- » Usable in any position.
- » Alloy steel valve body appears more artistic and handy.
- » While the toe is higher than the base, then cylinder can be rotated in 360 degrees.
- » Lowering speed can be accurately adjusted.
- » Equipped with safety valve for overload protection.
- » Convenient and rotatable handle hub for easy operation in any direction.
- » The base is alloy steel forged, to make sure high strength.
- » Conforms to the latest Machinery Directive and EN safety standards.

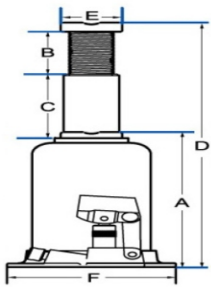

Model	Rated capacity (kg)	Lifting stroke on toe (mm)	Lifting stroke on head (mm)	Effort on handle (N)	Net weight (kg)	Package size (cm)
MT 5K	5000	25-230	368-573	≤380	25	36.5x20x43
MT 10K	10000	30-260	420-650	≤400	35	38x22.5x48.5
MT 25K	25000	58-273	505-720	≤400	102	54x32x61.5
